

Real-time Information Drives Cost Savings

Energy consumption and cost savings with accurate, real-time energy usage awareness.

Smart Home Integration

Integrates with smart devices in your home, such as in-home displays, hubs, and sensors.

Reduce Emissions Footprint

Revolutionizes consumer knowledge to optimize energy consumption to reduce impact on the environment and reduce emissions footprint.

Extended Range

Standard technology, certified interoperability, global 2.4 GHz spectrum and regional Sub-GHz serve all markets including single-family, multi-dwelling units and commercial buildings.

No Internet Dependency

Does not rely on availability of Internet in homes and buildings, ensuring affluent and underserved areas can take advantage of the same reliable technology.
