

Zigbee Smart Energy is the world's leading standard for interoperable products that monitor, control, inform, and automate the delivery and use of energy, gas, water, and heat. It enables accurate real-time distribution of information for consumers to monitor their consumption while giving utilities a tool for demand response, more efficient billing, and better service to customers.

Real-time usage information

Consumption optimization

Accurate billing for consumers

Reduced carbon footprint

Balance for peak usage

Support of energy regulations

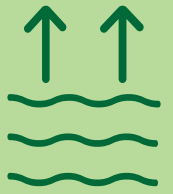

Electricity

Gas

Water

Heat

Renewables Sub-meters
